Study Suggestions: Keeping up is probably this most important thing you can do in this class. Many students find they spend at least 10 hours per week outside of the classroom studying for CHM 2212. I suggest the following methods that the most successful students tend to employ:

1) attend every lecture and recitation.
2) try to read the next few sections of the text we are to cover before lecture.
3) diligently work most if not all of the problems I suggest in the text; these should be done well before the night before a quiz!
4) come prepared to ask questions at recitation.
5) study in 1-2 hours increments frequently, instead of infrequent marathon sessions.

Online help: I am available for online help quite frequently. The way to do so is via AOL's Instant Messenger service. My screenname is "CHM2211". If you haven't already done so, I suggest you get AOL AIM up and running on your computer (it is free).
